The Interleaving technique

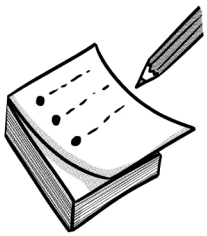
Information for parents and carers

Did you know?

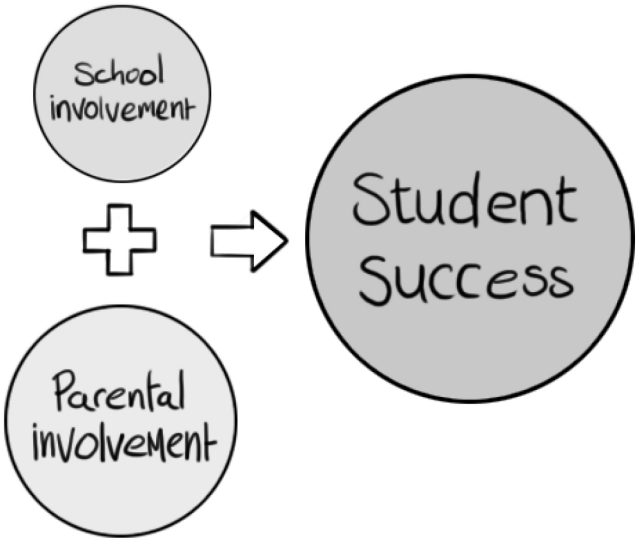
Interleaving is a method used to help students revise and remember more for the exam. It is about what students do with their time when they revise. With the interleaving technique, learning is spread over time, in smaller chunks, rather than dedicating a whole day for one subject or topic.

Research says 'Mixing it up boosts learning' when compared to more traditional methods of block learning where students master one topic before moving on to the next in preparation for exams. Studies have highlighted that students who use interleaving perform better on the examination if the examination was more than one day away.

Evidence highlights that interleaving strengthens memory recall because by revisiting material from each topic several times, in short bursts, students can increase the amount they remember in exams.



What can you do?



Watch this video with your child to understand more about how interleaving works - https://youtu.be/WbDpYMp8F6o

Help your child to decide on the key topics they need to learn for each subject. Work with your child to create a revision timetable which spaces their topics out across a good period of time.

Short bursts of revision are more effective than long sessions so encourage your child to mix topics up and do little and often as quality is better than quantity. Encourage them to take regular breaks in their revision and not to focus on the same topic for a whole day!
